NEUROPEPTIDES

Neuropeptides (1993) **24**, 373–377
© Longman Group UK Ltd 1993

Subject Index to Volume 24

Note: the abstracts contained in Volume 24 Number 4 have not been included in the index.

A

Acetorphan inhibition of enkephalinase, effects on the pre- and post-prandial electromyographic patterns of colon in rats of, 299
Acupuncture: increased release of immunoreactive cholecystokinin-8 by electroacupuncture and enhancement of analgesia by CCK-B antagonist in rat spinal cord, 139
Adenylate cyclase: somatostatin modulation of adenosine receptor coupled G-protein subunits in the rat caudate nucleus, 293
Adrenal gland
  arginine-vasopressin release mediates the aldosterone secretagogue effect of neurotensin in rats, 105
  effects of neuromedin-N on the pituitary-adrenocortical axis of dexamethasone-suppressed rats, 1
  identification of multiple tachykinins in bovine adrenal medulla using an improved chromatographic procedure, 91
  interleukin-1β levels in rat spleen and thymus of adrenalectomized arthritic animals, 367
Airway: effects of synthetic tachykinin receptor antagonists on ferret airway mucus secretion and bronchoconstriction, 81
Aldosterone
  arginine-vasopressin release mediates the aldosterone secretagogue effect of neurotensin in rats, 105
  effects of neuromedin-N on the pituitary-adrenocortical axis of dexamethasone-suppressed rats, 1
Amygdala, medial nucleus of: colocalization of substance P and neurokinin A in the central chemosensory pathway of the male golden hamster, 327
Antinociception *see* Nociception
Apoptosis: vasoactive intestinal peptide potentiates the effect of retinoic acid on tissue transglutaminase activity in human neuroblastoma SK-N-SH cells, 99
Arginine-vasopressin release mediates the aldosterone secretagogue effect of neurotensin in rats, 105
Arthritis: interleukin-1β levels in rat spleen and thymus are increased during chronic inflammatory stress, 367

B

Baclofen, modulation of paired-pulse activation in the hippocampal dentate gyrus by, 263
Behaviour
  feeding: effect of paraventricular injection of neuropeptide Y on milk and water intake of preweanling rats, 177
  feeding: and K^+-stimulated neuropeptide Y release into the paraventricular nucleus, 307
  maternal: acute cocaine treatment decreases oxytocin levels in the rat hippocampus, 165
  mating: colocalization of substance P and neurokinin A in the central chemosensory pathway of the male golden hamster, 327
Bicuculline, modulation of paired-pulse activation in the hippocampal dentate gyrus by, 263
Bombesin/gastrin-releasing peptide-preferring and neuromedin B-preferring receptors in the rat urogenital system, 43
Brain injury: evidence for a role of noradrenergic neurons in the increase in concentration of preprocholecystokinin mRNA after cerebral cortex injury in rats, 145
Brainstem
  autoradiographic localization of somatostatin mRNA in the adult rat: observation by the double illumination technique, 71
  release of neuropeptide Y from sites in the cat during isometric contractions, 53
Bronchoconstriction: effects of synthetic tachykinin receptor antagonists on ferret trachea, 81
Bufo marinus, cardiovascular effects of amphibian and mammalian tachykinins in, 171

C

Calcitonin gene-related peptide (CGRP)
  effects on rabbit electroretinogram of, 151
  influence of neurokinins and CGRP on cerebral blood flow in anaesthetized guinea-pigs, 343
  neural and non-neural origin of CGRP in the gastric mucosa, 117
Cardiovascular system *see* Heart; Vascular system
Caudate nucleus of rat, somatostatin modulation of adenosine receptor coupled G-protein subunits in, 293
Cell differentiation/proliferation
  effects of selective tachykinin receptor antagonists on the growth of human skin fibroblasts, 335
  nerve growth factor induces a succession of increases in isoprenylated methylated small GTP-binding proteins of PC-12 phaeochromocytoma cells, 11
  nerve growth factor regulates tachykinin gene expression and biosynthesis in rat sensory neurons during early postnatal development, 351
  vasoactive intestinal peptide potentiates effect of retinoic acid on tissue transglutaminase activity in human neuroblastoma SK-N-SH cells, 99
Cerebral blood flow, influence of neurokinins and calcitonin gene-related peptide on, 343
Cerebral cortex
  evidence for a role of noradrenergic neurons in the increase

in concentration of preprocholecystokinin mRNA after injury in rats, 145
examination of the involvement of neuropeptide Y in cerebral autoregulation using the novel antagonist PP56, 27
Cholecystokinin (CCK)
evidence for role of noradrenergic neurons in the increase in concentration of preprocholecystokinin mRNA after cerebral cortex injury in rats, 145
immunocytochemistry of sequence-related neuropeptides in *Drosophila*: drosulfakinin I is a CCK homologue, 321
increased release of immunoreactive CCK-8 by electroacupuncture and enhancement of analgesia by CCK-B antagonist in rat spinal cord, 139
modulation of paired-pulse activation in the hippocampal dentate gyrus by CCK-8S baclofen and bicuculline, 263
Cocaine: acute treatment decreases oxytocin levels in the rat hippocampus, 165
Colon: action of enkephalinase inhibition on pre- and postprandial electromyographic patterns in rats, 299
Corticosteroids
effects of neuromedin-N on the pituitary-adrenocortical axis of dexamethasone-suppressed rats, 1
and increased levels of interleukin-1β in rat spleen and thymus during chronic inflammatory stress, 367
simultaneous changes in hypothalamic catecholamine levels and plasma corticosterone concentration in naive and in morphine-tolerant rats, 279

D

Delta sleep-inducing peptide release and metabolism in the rat brain, 131
Dopamine: simultaneous changes in hypothalamic levels and plasma corticosterone concentrations in naive and in morphine-tolerant rats, 279
Dorsal root ganglia: nerve growth factor regulates tachykinin gene expression and biosynthesis in rat sensory neurons during early postnatal development, 351
Drinking behaviour: effect of paraventricular injection of neuropeptide Y on milk and water intake of preweanling rats, 177
Dromyosuppressin, 321
Drosophila melanogaster, immunocytochemistry of sequence-related neuropeptides in, 321
Drosulfakinin I, 321

E

Eledoisin: electrophysiological effects of tachykinin analogues on ganglion cell activity in cyprinid fish retina, 109
Endothelin-1: effects on postjunctionally-mediated purinergic and adrenergic components of rat vas deferens contractile responses, 35
Enkephalin(s)
action of enkephalinase inhibition on the pre- and postprandial electromyographic patterns of rat colon, 299
characterization of neuropeptides extracted from canine intestine, 359
Eye
effects of calcitonin gene-related peptide on the rabbit electroretinogram, 151
electrophysiological effects of tachykinin analogues on ganglion cell activity in cyprinid fish retina, 109

F

Feeding
action of enkephalinase inhibition on the pre- and postprandial electromyographic patterns of colon in the rat, 299
effect of paraventricular injection of neuropeptide Y on milk and water intake of preweanling rats, 177
K^+-stimulated neuropeptide Y release into the paraventricular nucleus and relation to feeding behaviour in free-moving rats, 307
FMRFamide-related peptides: immunocytochemistry of sequence-related neuropeptides in *Drosophila*, 321

G

GABA (gamma-aminobutyric acid): modulation of paired-pulse activation in the hippocampal dentate gyrus by cholecystokinin baclofen and bicuculline, 263
Gastrin-releasing peptide/bombesin-preferring and neuromedin B-preferring receptors in the rat urogenital system, 43
Gastrointestinal tract
action of enkephalinase inhibition on the pre- and postprandial electromyographic patterns of colon in the rat, 299
characterization of neuropeptides extracted from canine intestine, 359
neural and non-neural origin of calcitonin gene-related peptide in the gastric mucosa, 117
Glutamate: N-Acetylaspartylglutamate catabolism is achieved by an enzyme on the cell surface of neurons and glia, 271
Growth factor(s) *see* Nerve growth factor
Guanosine nucleotides
effects of nerve growth factor on GTP-binding proteins of PC-12 phaeochromocytoma cells, 11
somatostatin modulation of adenosine receptor coupled G-protein subunits in the rat caudate nucleus, 293

H

Heart
cardiac electrophysiological effects of U-50,488H on guinea-pig papillary muscle, 313
cardiovascular effects of amphibian and mammalian tachykinins in the toad *Bufo marinus*, 171
Hippocampus
acute cocaine treatment decreases oxytocin levels in the rat, 165
modulation of paired-pulse activation in the dentate gyrus by cholecystokinin baclofen and bicuculline, 263
Histamine release from a murine mast cell line elicited by C-terminal substance P fragments, 5
Hypothalamus
isolation of Tyr-W-MIF-1 from bovine tissue, 159
K^+-stimulated neuropeptide Y release into the paraventricular nucleus and relation to feeding behaviour in free-moving rats, 307
simultaneous changes in hypothalamic catecholamine levels and plasma corticosterone concentration in naive and in morphine-tolerant rats, 279

I

Inflammation, chronic, increased levels of interleukin-1β in rat spleen and thymus during, 367

Interleukin-1β measured by radioimmunoassay in the rat spleen and thymus is increased during chronic inflammatory stress, 367
Intestine *see* Gastrointestinal tract

M

Mating behaviour: colocalization of substance P and neurokinin A in the central chemosensory pathway of the male golden hamster, 327
Melanocyte-stimulating hormone release-inhibiting factor: isolation of Tyr-W-MIF-1 from bovine hypothalami, 159
Micturition reflex in rats; effects of selective neurokinin agonists and evidence for a dual NK-l receptor-mediated excitatory and inhibitory activity, 285
Morphine
  antinociception, influence of oxytocin on, 125
  simultaneous changes in hypothalamic catecholamine levels and plasma corticosterone concentration in naive and in morphine-tolerant rats, 279
Muscle
  action of enkephalinase inhibition on the pre- and post-prandial electromyographic patterns of colon in the rat, 299
  bombesin/gastrin-releasing peptide-preferring and neuromedin B-preferring receptors in the rat urogenital system, 43
  cardiac electrophysiological effects of U-50,488H on guinea-pig papillary muscle, 313
  effects of endothelin-1 on postjunctionally-mediated purinergic and adrenergic components of rat vas deferens contractile responses, 35
  effects of selective neurokinin agonists upon the activation of micturition reflex in rats: evidence for a dual NK-1 receptor-mediated excitatory and inhibitory activity, 285
  influence of neurokinins and calcitonin gene-related peptide on cerebral blood flow in anaesthetized guinea-pigs, 343
  neuropeptide Y release from brainstem sites in the cat during isometric contractions, 53
  tachykinin control of ferret airways: mucus secretion bronchoconstriction and receptor mapping, 81

N

N-Acetylaspartylglutamate catabolism is achieved by an enzyme on the cell surface of neurons and glia, 271
Nerve growth factor
  induces a succession of increases in isoprenylated methylated small GTP-binding proteins of PC-12 phaeochromocytoma cells, 11
  regulates tachykinin gene expression and biosynthesis in rat sensory neurons during early postnatal development, 351
Neuroblastoma: vasoactive intestinal peptide potentiates the effect of retinoic acid on tissue transglutaminase activity in SK-N-SH cells, 99
Neurokinin (NK)/ neurokinin receptors
  cardiovascular effects of amphibian and mammalian tachykinins in the toad *Bufo marinus*, 171
  characterization of the binding of [^{125}I-Iodo-histidyl, methyl Phe^7] neurokinin B to the NK-3 receptor, 317
  C-terminal substance P fragments elicit histamine release from a murine mast cell line, 5
  effects of selective neurokinin agonists upon the activation of micturition reflex in rats: evidence for a dual NK-1 receptor-mediated excitatory and inhibitory activity, 285
  effects of selective tachykinin receptor antagonists on the growth of human skin fibroblasts, 335
  electrophysiological effects of tachykinin analogues on ganglion cell activity in cyprinid fish retina, 109
  identification of multiple tachykinins in bovine adrenal medulla using an improved chromatographic procedure, 91
  influence of neurokinins and calcitonin gene-related peptide on cerebral blood flow in anaesthetized guinea-pigs, 343
  nerve growth factor regulates tachykinin gene expression and biosynthesis in rat sensory neurons during early postnatal development, 351
  substance P and neurokinin A are colocalized in the central chemosensory pathway of the male golden hamster, 327
  tachykinin control of ferret airways: mucus secretion bronchoconstriction and receptor mapping, 81
Neuromedin-B-preferring and bombesin/gastrin-releasing peptide-preferring receptors in the rat urogenital system, 43
Neuromedin-N, effects on the pituitary-adrenocortical axis of dexamethasone-suppressed rats of, 1
Neuropeptide γ and neuropeptide K in bovine adrenal medulla: identification using an improved chromatographic procedure, 91
Neuropeptide Y (NPY)
  effect of paraventricular injection of NPY on milk and water intake of preweanling rats, 177
  involvement in cerebral autoregulation of, 27
  K^+-stimulated neuropeptide Y release into the paraventricular nucleus and relation to feeding behaviour in free-moving rats, 307
  release from brainstem sites in the cat during isometric contractions, 53
Neurotensin: aldosterone secretagogue effect in rats is mediated by release of arginine-vasopressin, 105
Nociception
  increased release of immunoreactive cholecystokinin-8 by electroacupuncture and enhancement of analgesia by CCK-B antagonist in rat spinal cord, 139
  influence of oxytocin on nociception and morphine antinociception, 125
Noradrenergic neurons
  effects of endothelin-1 on rat vas deferens contractile responses, 35
  evidence for a role of noradrenergic neurons in the increase in concentration of preprocholecystokinin mRNA after cerebral cortex injury in rats, 145
  simultaneous changes in hypothalamic catecholamine levels and plasma corticosterone concentration in naive and in morphine-tolerant rats, 279

O

Opioids
  action of enkephalinase inhibition on the pre- and post-prandial electromyographic patterns of colon in the rat, 299
  cardiac electrophysiological effects of U-50,488H on guinea-pig papillary muscle, 313
  increased release of immunoreactive cholecystokinin-8 by electroacupuncture and enhancement of analgesia by CCK-B antagonist in rat spinal cord, 139

influence of oxytocin on nociception and morphine antinociception, 125
isolation of Tyr-W-MIF-1 from bovine hypothalami, 159
simultaneous changes in hypothalamic catecholamine levels and plasma corticosterone concentration in naive and in morphine-tolerant rats, 279
Oxytocin
acute cocaine treatment decreases levels in rat hippocampus of, 165
influence on nociception and morphine antinociception of, 125

P

p21ras protein: nerve growth factor induces a succession of increases in isoprenylated methylated small GTP-binding proteins of PC-12 phaeochromocytoma cells, 11
Pain *see* Nociception
Paraventricular nucleus
effect on milk and water intake of preweanling rats of injection of neuropeptide Y into, 177
K^+-stimulated neuropeptide Y release into, relation to feeding behaviour in free-moving rats of, 307
PC-21 phaeochromocytoma cells, effects of nerve growth factor on, 11
Periaqueductal grey: release of neuropeptide Y in the cat during isometric contractions, 53
Physalaemin
cardiovascular effects of amphibian and mammalian tachykinins in the toad *Bufo marinus*, 171
electrophysiological effects of tachykinin analogues on ganglion cell activity in cyprinid fish retina, 109
Potassium-stimulated neuropeptide Y release into the paraventricular nucleus and relation to feeding behaviour in free-moving rats, 307
PP56 (neuropeptide Y antagonist): in examination of role of NPY in cerebral autoregulation, 27
Pro-opiomelanocortin processing in heterologous neuronal cells that express PC2 mRNA, 253

R

Ranakinin: cardiovascular effects of amphibian and mammalian tachykinins in the toad *Bufo marinus*, 171
Retina
effects of calcitonin gene-related peptide on the rabbit electroretinogram, 151
electrophysiological effects of tachykinin analogues on ganglion cell activity in cyprinid fish retina, 109
Retinoic acid: effect on tissue transglutaminase activity in human neuroblastoma SK-N-SH cells is potentiated by vasoactive intestinal peptide, 99
Rutilus rutilus retina, electrophysiological effects of tachykinin analogues on ganglion cell activity in, 109

S

Sexual behaviour: colocalization of substance P and neurokinin A in the central chemosensory pathway of the male golden hamster, 327
Skin fibroblasts, human, effect of selective tachykinin receptor antagonists on growth of, 335
Sleep: characterization of the release and metabolism of delta sleep-inducing peptide in the rat brain, 131
Somatostatin (SS)
autoradiographic localization of SS mRNA in the adult rat lower brainstem: observation by the double illumination technique, 71
modulation of adenosine receptor coupled G-protein subunits in the rat caudate nucleus, 293
Spinal cord: increased release of immunoreactive cholecystokinin-8 by electroacupuncture and enhancement of analgesia by CCK-B antagonist in rat spinal cord, 139
Spleen levels of interleukin-1β in the rat are increased during chronic inflammatory stress, 367
Stomach: neural and non-neural origin of calcitonin gene-related peptide in the gastric mucosa, 117
Substance P (SP)
cardiovascular effects of amphibian and mammalian tachykinins in the toad *Bufo marinus*, 171
colocalization of SP and neurokinin A in the central chemosensory pathway of the male golden hamster, 327
C-terminal fragments elicit histamine release from a murine mast cell line, 5
effects of selective neurokinin agonists upon the activation of micturition reflex in rats: evidence for a dual NK-1 receptor-mediated excitatory and inhibitory activity, 285
effects of selective tachykinin receptor antagonists on the growth of human skin fibroblasts, 335
electrophysiological effects of tachykinin analogues on ganglion cell activity in cyprinid fish retina, 109
extracted from canine intestine, 359
identification of multiple tachykinins in bovine adrenal medulla using an improved chromatographic procedure, 91
influence of neurokinins and calcitonin gene-related peptide on cerebral blood flow in anaesthetized guinea-pigs, 343
nerve growth factor regulates tachykinin gene expression and biosynthesis in rat sensory neurons during early postnatal development, 351
tachykinin control of ferret airways: mucus secretion bronchoconstriction and receptor mapping, 81

T

Tachykinin(s)
gene expression and biosynthesis in rat sensory neurons during early postnatal development, regulation by nerve growth factor of, 351
see also Neurokinin/neurokinin receptors
Testis, identification localization and developmental studies of rat preprothyrotropin-releasing hormone mRNA in, 63
Thymus levels of interleukin-1β in the rat are increased during chronic inflammatory stress, 367
Thyrotropin-releasing hormone (TRH): identification localization and developmental studies of preproTRH mRNA in the rat testis, 63
Tissue transglutaminase activity in human neuroblastoma SK-N-SH cells: effect of retinoic acid is potentiated by vasoactive intestinal peptide, 99
Trigeminal ganglia: nerve growth factor regulates tachykinin gene expression and biosynthesis in rat sensory neurons during early postnatal development, 351
Tumour/tumour cells
nerve growth factor induces a succession of increases in

isoprenylated methylated small GTP-binding proteins of PC-12 phaeochromocytoma cells, 11
vasoactive intestinal peptide potentiates effect of retinoic acid on tissue transglutaminase activity in human neuroblastoma SK-N-SH cells, 99
Tyr-W-MIF-1, isolation from bovine hypothalami of, 159

U

U-50,488H (K agonist), cardiac electrophysiological effects on guinea-pig papillary muscle of, 313
Urogenital system
bombesin/gastrin-releasing peptide-preferring and neuromedin B-preferring receptors in the rat urogenital system, 43
effects of endothelin-1 on postjunctionally-mediated purinergic and adrenergic components of rat vas deferens contractile responses, 35
effects of selective neurokinin agonists upon the activation of micturition reflex in rats: evidence for a dual NK-1 receptor-mediated excitatory and inhibitory activity, 285
identification localization and developmental studies of preprothyrotropin-releasing hormone mRNA in the rat testis, 63

V

Vas deferens contractile responses in rat, effects of endothelin-1 on, 35
Vascular system
cardiac electrophysiological effects of U-50,488H on guinea-pig papillary muscle, 313
cardiovascular effects of amphibian and mammalian tachykinins in the toad *Bufo marinus*, 171
examination of the involvement of neuropeptide Y in cerebral autoregulation using the novel antagonist PP56, 27
influence of neurokinins and calcitonin gene-related peptide on cerebral blood flow in anaesthetized guinea-pigs, 343
Vasoactive intestinal peptide
extracted from canine intestine, 359
potentiates the effect of retinoic acid on tissue transglutaminase activity in human neuroblastoma SK-N-SH cells, 99
Vasopressin: arginine-vasopressin release mediates the aldosterone secretagogue effect of neurotensin in rats, 105
Ventrolateral medulla: release of neuropeptide Y in the cat during isometric contractions, 53

Z

Zona glomerulosa cells
arginine-vasopressin release mediates the aldosterone secretagogue effect of neurotensin in rats, 105
effects of neuromedin-N on the pituitary-adrenocortical axis of dexamethasone-suppressed rats, 1
